

WASHBASIN BRACKET

Basicline 403 Washbasin Bracket - Manual Height Adjustable Lift System

Basicline 403 is a **height adjustable washbasin bracket lift which is manually adjusted**. Used to **lower and raise washbasins vertically**.

The system is designed for use in **seated or standing** positions to improve accessibility and **usability** for individuals and carers. **Designed for infrequent or occasional adjustment for individuals or carers**.

It provides easy and direct access in a seated position, compared to side access with standard, non-adjustable washbasins or vanities. Making it easier, safer, less stress and strain for users and carers.

Mirrors or cabinets can be mounted above. Different basins can be mounted on the bracket to suit lift and flexible waste plumbing systems are recommended for height adjustment which can be sourced and supplied in Australia.

Our height adjustable washbasin bracket lift systems help create **adaptable and functional** environments for individuals and facilities. This **assistive technology** caters for all ages, varying needs and abilities whilst promoting participation and independence.

Available in 3 depths – 3.6cm, 12.0cm, 22.0cm
