

UNILIFT 870

Kitchen appliance lift

UNILIFT raises a board upwards and outwards from the bottom of a cabinet or tall cabinet. A kitchen appliance, microwave oven or other household machinery can be placed on the board.

With a simple press of a button, the height of the board is adjusted to optimal working height.

Functions and advantages

- Raises heavy household appliances to a comfortable height
- The movement can be stopped at any height.
- Easily mounted on the bottom of a cabinet or tall cabinet.
- Can be mounted in new or existing cabinets

Standard equipment

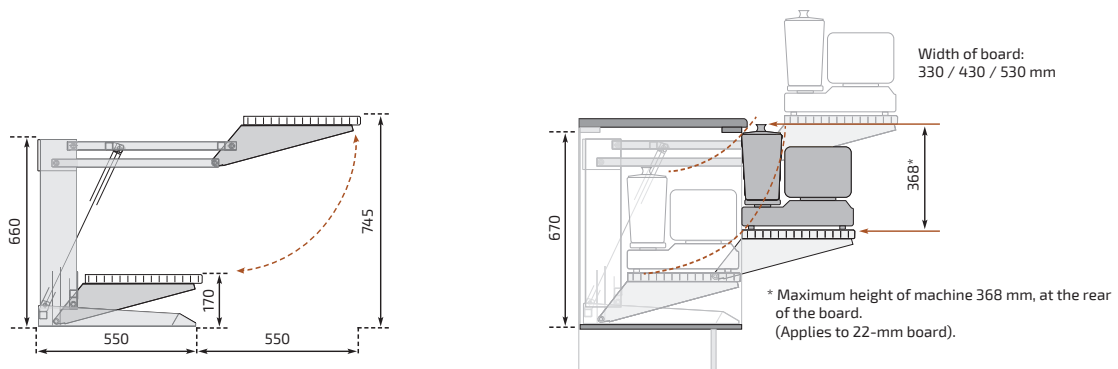

- Wired hand control
- Work surface board
