VERTI 830 / 831

Vertical lifting system for wall cabinets

MADE IN SWEDEN

VERTI is an electric height-adjustable lifting system which is mounted into the wall cabinet. It is used to lower and raise the cabinet shelves in a vertical motion to and from the worktop, at the touch of a button.

The movement can be stopped at a desired height. The lift is fitted with a safety system and stops lowering when it comes into contact objects on the worktop.

The contents of the cabinet are accessible without having to open the doors. When lowered, there is free space on the worktop in front of the shelves.

Easy and safe to use to carry out everyday living tasks. The lift takes up little space and can easily be mounted in existing or new cabinets.

Fits wall cabinets that are 70 cm high or taller. The lift is available in two different depths and in a wide range of widths to fit cabinets that are 40-100 cm wide.

The contents are easy to reach when the shelves are lowered. Can be positioned over a worktop with an open front which provides space for knees.

VERTI is suitable for use over a work surface since after being lowered, there is still space at the front of the worktop.

VERTI is mounted inside the wall cabinet and is fully concealed when in the raised position.

VERTI 830 / 831

Functions and advantages

- Lowers the shelf unit vertically down to the top board
- When lowered, there is free space on the worktop in front of the shelves
- Installed in a new or existing cabinet from which the bottom has been removed
- Safety plate stops the lowering if it comes in contact with any object on the underlying work surface
- Fits cabinets with width 40-100 cm

Standard equipment

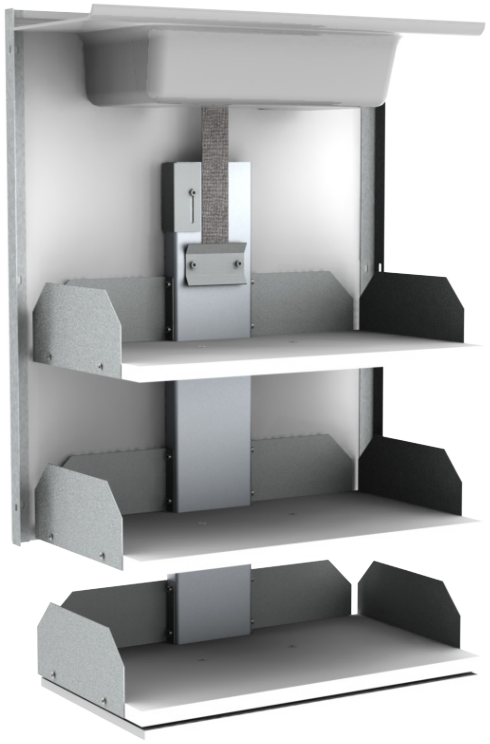
- Control button
- Safety switch under the bottom shelf
- Motor cover with built-in safety switch

Recommended additional options

- Lighting

Useful information

- Leaves a 22-mm gap from wall (space for tiling)
- Model 830 fits cabinets with an inner depth of 265-314 mm. The shelf depth is 242 mm
- Model 831 fits cabinets with an inner depth of 315 mm or more. The shelf depth is 286 mm
- For cabinets taller than 700 mm, a fixed shelf is mounted above the lift
- Electronics and motor system "Plug and Play"



Specifications

Lift model	Vertical lifting system for wall cabinets
Height adjustment	Motorised, steplessly adjustable 470 mm downwards
Speed	47 mm/sec.
Manoeuvring	Wired button
Safety	Safety plate under the bottom shelf. If anything touches the plate, the lift stops. The plastic cover in the upper part of the cabinet acts as a safety breaker upwards. If the plastic cover is touched, the lift stops.
Electricity connection	Plug for 230 V, max 0.5 A
Lifting power	40 kg
IP Class	IP30
Height	680 mm
Fits cabinets with width	400-1000 mm
Fits cabinets with height	700 mm or higher (for heights over 700 mm, a fixed shelf is mounted above the lift)
Fits cabinets with inner depth	VERTI 830: 265 - 314 mm VERTI 831: From 315 mm
Fits cabinet frames with side thickness	16-20 mm
Material specifications	Back plate (thickness 16 mm) and shelves (thickness 19 mm) in white melamine. Safety plate of white-painted MDF. Powder-lacquered sheet metal parts (Alu-grey RAL 9006), motor cover in Alu-grey plastic. Aluminium sliding rail.
Warranty	2 year
	CE
